# B&K AV1260 Twelve Channel Amplifier

*Deliver your musical enjoyment to every room in the house!*

America's premier manufacturer of state-of-the-art music and home theater sound systems presents two multi-media

room amplifiers that deliver incredible sound to any room, anywhere, anytime you want.

Utilizing B&K's legendary audio circuits, combined with smart home technology, these amplifiers are customized and programmable to invisibly and efficiently deliver sound enjoyment everywhere in your home.

Whether it's music in the bedroom, outside in the yard, or background throughout the house, B&K delivers crystal clear highs and powerful bass all at the touch of a button. With B&K's unique control system, these incredibly flexible amplifiers have almost unlimited ability to grow and adapt to your changing home entertainment needs.

## ***B&K You'll know.***

Whatever the source is, you'll know you're hearing it through B&K Components.

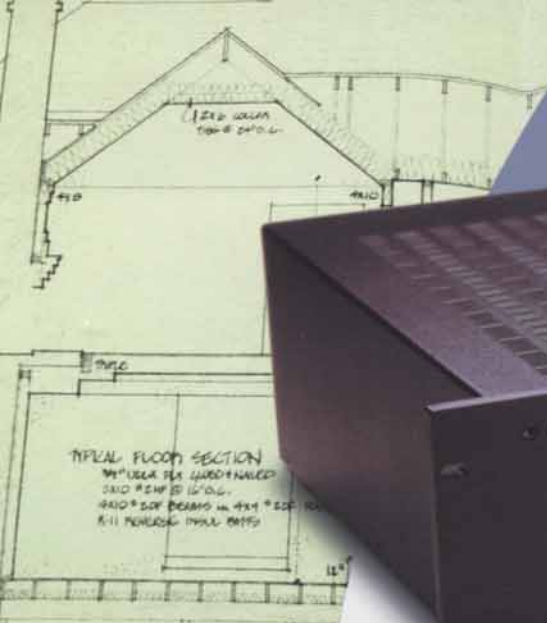

- Watching TV
- Playing DVD's
- Reminiscing with your old vinyl
- Listening to CD's and tapes
- Renting videos

And no matter where you are, your B & K amp will provide the kind of sound you've only imagined until now. Whether you're monitoring the traffic jams in the morning or relaxing in the hot tub in the evening, your B & K amp will get every measure of music to you.

## ***B&K They'll Know.***

Your guests may know all about toroidal transformers, discrete computer grade capacitors and the benefits of 1% film resistors. With B&K they'll hear the difference.

*We simply make every room of your house... sound better!*

# B&K AV2600 Six Channel Amplifier

The toroidal transformer, together with B & K's use of high current amplification, means that your B & K amp can reproduce demanding recordings – the clear high notes of Memories, the muscle of Smashing Pumpkins or the drop of the knife in Madame Butterfly.

If the Super Bowl is on, they'll hear every collision from every room wired to your system. Or, if you're entertaining guests on your deck some hot summer night, you can relax and enjoy every breath of the latest Celtic singer.

The use of 1% metal film resistors mean that Mozart's rests really are rests, not white-noise fuzz. And, no matter how many times you play the Barney song for your toddler, every syllable will ring true.

Gold-plated connectors mean that nothing is lost, not a note, not a syllable – whether the sound is the video your sister-in-law shot at your daughter's graduation or all the technology at the disposal of The Metropolitan Opera House. :|

B & K AV2600  
Six Channel Amplifier

## *B & K Did you know?*

B & K is the choice of experts from Stereo Review, Sound & Vision and Home Theater Magazine.

- Rated #1 in Sound Quality
- Rated #1 in Construction Quality
- Rated #1 in Overall Value

You'll also learn that the B & K system you bought sounds better than any other system you've ever owned.

With over 20 years of experience building the finest in audio equipment, B & K has the experience, commitment, and ability to provide you consistently with state-of-the-art sound in every room in your house. :|

*We simply sound better.*

*For relaxing ...  
For entertaining ...  
For your lifestyle ...*
